## **PROGRAMME SPECIFIC OUTCOME (PSOs)**

After completing three years course of in Information Technology, the learner will be able to:

1. Equip with the professional & technical skills essential for making a career in the Front-end Developer, Back-end Developer, Software Tester, Programmer, Network Administrator, Security Expert etc.
2. Students would demonstrate the ability to apply research principles in a variety of creative, organizational, professional venues.
3. Apply the knowledge of engineering and management principles to manage projects effectively in diverse environments as a member or a leader in the team
4. Learners will understand technology as a system of interrelated forces, including automation, Robotics, Big data analytics, Advance Programming, Networking, Security, Cyber law, Regulatory constraints, and ethical concerns.
5. Learners will be able to create and design technological products, including website, software, robots, RFID, Hardware Automation, Also, will be able to become Software Engineer, Tester, and Pen testers

### **PREAMBLE**

With the introduction of Choice Based Credit System (CBCS) by the esteemed University of Mumbai from academic year 2016-17, the existing syllabus of FYBSCIT is restructured according to the CBCS pattern.

In the last two decades, technology has made a paradigm shift in the way society functions. Media, being the important segment of the society plays a pivotal role in the political, sociological, psychological, and economical aspects in society. In addition to the knowledge of the technical skills of mass media, the current syllabus orients to the theoretical framework relating to media-audience relationship.

The first year of BSCIT course introduces the students to various fields available under the umbrella of mass Programming, Mathematics, Communication Skills, Software's, Database, Website Design.

The fundamentals of Information Technology prepare the students for advanced theoretical and practical related to field introduced. In the second year of BSCIT, followed by the elaboration on Information Technology research concepts and methodologies. Inclusion of field-based learning begins in the third year of BSCIT, with specialization in Information Technology.

<b>PROGRAM: FYBSCIT</b>		<b>SEMESTER: II</b>			
<b>Course:OOPs with C++</b>		<b>Course Code: WSITCMJ121</b>			
<b>Teaching Scheme</b>					<b>Evaluation Scheme</b>
<b>Lectures (Hours per week)</b>	<b>Practical (Hours per week)</b>	<b>Tutorial (Hours per week)</b>	<b>Credit</b>	<b>Continuous Internal Assessment (CA)(Marks-40)</b>	<b>Semester End Examination (Marks-60)</b>
2	-	-	2	40	60

**Learning Objectives:**

- 1) To make students familiar with object-oriented programming language.
- 2) To introduce the concept and process of writing and editing in oops.
- 3) To introduce students to different ways of delivering the information with data structure, inheritance, polymorphism concept

**Course Outcomes:**

After the end of the course, the learner will be able to:

- 1) Understand and incorporate the different writing styles in OOPS.
- 2) Employ the concepts OOPS.
- 3) Convert the textual data into machine readable data.

**DETAILED SYLLABUS**

<b>Unit</b>	<b>Subunit</b>	<b>Course/ Unit Title</b>	<b>Lecture s</b>
<b>I</b>	1.1	<b>Object Oriented Methodology:</b> Introduction, Advantages and Disadvantages of Procedure Oriented Language, what is Object Oriented? What Is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS	3L

	1.2	<b>Principles of OOPS:</b> OOPS Paradigm, Objects, Classes, Data Abstraction and Data Encapsulation, Inheritance, Polymorphism, Dynamic Binding.	2L
	1.3	<b>Classes and Objects:</b> Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument, Returning object from functions, friend classes	3L
<b>II</b>		<b>Constructor, Destructor, Polymorphism, Virtual Function</b>	
	2.1	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors	3L
	2.2	Polymorphism: Concept of function overloading, overloaded operators, overloading unary and binary operators, overloading comparison operator,overloading arithmetic assignment operator, Data Conversion between objects and basic types	3L
		Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer,abstract classes, virtual destructors	4L
<b>III</b>		<b>Inheritance &amp; Exception Handling</b>	
		Inheritance: Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, derived class constructors, class hierarchies, multiple inheritance, multilevel inheritance.	4L
		Exception Handling: Introduction, Exception Handling Mechanism, Concept of throw & catch	2L
<b>IV</b>		<b>Files</b>	
		Working with Files: Introduction, File Operations, Various File Modes.	2L

		Conditional Statements: Order of Operations. if,if- else, nested if –else <b>Looping:</b> for, while, nested loops.	2L
		Templates and Conditional Statement:- Templates: Introduction, Function Template and examples, Class Template and examples	2L

3		Port I / O: Use one of the four ports of 8051 for O/P interfaced to eight LED's.  Simulate binary counter (8 bit) on LED's	
4		Interface 8051 with D/A converter and generate triangular wave of given frequency on an oscilloscope.	
5		To demonstrate timer working in timer mode and blink LED without using any loop delay routine.	
6		To interface 8 LEDs at Input-output port and create different patterns.	
7		Serial I / O: Configure 8051 serial port for asynchronous serial communication with serial port of PC exchange text messages to PC and display on PC screen. Signify end of message by carriage return.	
8		To demonstrate interfacing of seven-segment LED display and generate counting from 0 to 99 with fixed time delay.	
9		To demonstrate use of general purpose port i.e. Input/ output port of two controllers for data transfer between them.	
10		Interface stepper motor with 8051 and write a program to move the motor through a given angle	

in clockwise or counter-clockwise direction.
